In 1942 radar expert Jack Nissenthall volunteered for a suicidal mission to join a combat team who were making a surprise landing at Dieppe in occupied France. His assignment was to penetrate a German radar station on a cliff above 'Green Beach'. Because Nissenthall knew the secrets of British and US radar technology, he was awarded a personal bodyguard of sharpshooters. Their orders were to protect him, but in the event of possible capture to kill him. His choice was to succeed or die.
